TFR ALERT

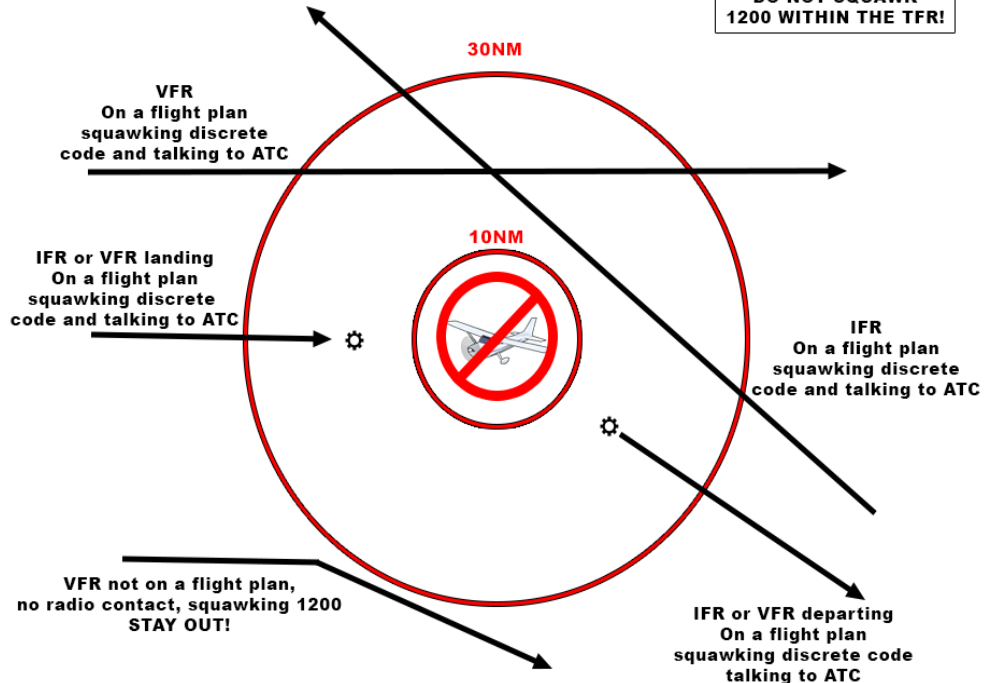

New Jersey

June 09-11, 2017

Who can fly...

**DO NOT SQUAWK
1200 WITHIN THE TFR!**

There will be VIP
Temporary Flight
Restrictions (TFR) in the
Morristown and Bedminster
Township, New Jersey
region. There may be
multiple NOTAMs.

FAA PILOTWEB
site for NOTAMs:
[https://pilotweb.nas.faa.gov/
PilotWeb/](https://pilotweb.nas.faa.gov/PilotWeb/)

Exact location and times may change. Pilots planning to fly in this region should check published NOTAMs frequently... **before every flight!**

Previous TFRs in this region have resulted in numerous airspace violations.

We need your help in getting the word out:

Please pass this information along to as many pilots and aviation professionals as possible

The procedures contained in this alert describe a typical Security TFR. Check the **published** NOTAMs for any changes or unique procedures. Several types of operations will be prohibited during this event. The published NOTAM will have specific details.

Inner Core: Usually a 10NM ring or rings. There may be multiple rings at different locations. General aviation is not permitted to operate within the Inner Core.

Outer Ring: From inner core to 30NM. Depending on location of inner rings there may be multiple outer rings. IFR and VFR flights are permitted as long as they are on a flight plan, squawking a discrete beacon code and talking to ATC. You may land or depart airports within the outer ring and fly through the outer ring as long as you follow the appropriate procedures. You shouldn't loiter within the TFR for any reason.

The FAA, the Department of Defense and other federal agencies will be closely monitoring and patrolling this airspace looking for violators.

Airport operators, managers and flight schools, please post this notice as widely as possible. If you know of an event planned for this weekend please check the published NOTAM to see if there is a conflict.

A FRIENDLY REMINDER COULD PREVENT AN AIRSPACE VIOLATION!
